

Description: This is a Pinterest page was developed for students (and faculty) to explore different learning technologies available.

Impact: In an effort to introduce students to available technologies, this resource was developed and will be referenced during new student orientation. Since Pinterest is a commonly used app in the UCAP population, this is familiar tool that students can use to access different resources that can help enhance projects and presentations, as well as help keep them organized during their time as an Ursuline student.

Intent: The adult student population is largely unfamiliar with available tools they can use that can help enhance their learning experience and quality of research during their undergraduate career. I developed this Pinterest page because this is a common app that many UCAP student are familiar with using and it is available at the touch of a button on mobile devices. I have introduced the UCAP Pinterest to students during new student orientation and will create access for other UCAP staff so that additional boards can be created. I think this tool will help our students access resources from a medium they are already familiar with and will give us opportunity as staff to “pin” items that may be of interest to our students and support their learning. Starting in the Spring 2019 term, I will inform our instructors and provide information about the Pinterest page for our current students to look up and utilize.
